

## Job offer

Cogitars GmbH is constantly looking for

### **Biostatisticians (f/m/d)**

#### **Who we are**

Cogitars GmbH is a company founded in 2013 that specializes in statistical advice in the field of clinical trials – and in particular in phase I. As a driver of innovation, we focus on the use of Bayesian statistics. As a consulting company in the field of oncology, vaccines and HTAs we have quickly become a service provider for multinational studies of well-known pharmaceutical companies. A relevant number of innovative biotech companies also rely on us. Because of the innovative power and the uniqueness of our services, we were able to constantly develop and grow our company.

#### **Who we are looking for**

We are looking for Biostatisticians (f/m/d) to support our team, as we are constantly growing and looking for people who are curious to play an independent and individually tailored role in a growing company.

You should have completed your studies and have set relevant areas of study. You are familiar with Bayesian procedures and have already gained experience in dealing with these clinical trial designs. You are safe in dealing with R and/or SAS and speak English fluently. You are willing to travel occasionally as part of your activity.

### **What to expect from us**

As a small company, we are dependent on employees working independently and being willing to take responsibility. With us, therefore, you are not only one of many – you are an essential part of the company's development in important projects of our customers. You work at the Heidelberg site or from home and play an important role in consulting projects, software development or Data Analysis at Cogitars GmbH. We plan your development depending on your area of interest. We are constantly expanding the portfolio of our consulting services and are therefore very interested in what you can contribute to our company. Get in touch!

### **What's next**

Send us a meaningful application to: [michael.kruse@cogitars.com](mailto:michael.kruse@cogitars.com). We look forward to receiving your application.
